Job posting

# Academic Wordologist

I have the raw data, but I'm missing your flair. I am looking for someone to assist me with writing manuscripts and grants.

Help lay the foundation for a new clinical research laboratory specializing in cardiopulmonary rehabilitation and healthcare accessibility. Help me create a healthy work environment where your ideas matter. Enjoy a flexible schedule and the option to work either in-person (just steps from the Sauvé metro!) or remotely.

## Your responsibilities:

- Skim my drafts to turn them into the *crème de la crème* of manuscripts
- Pasteurize my texts so they stay fresh for peer review
- Reach for the Milky Way to help me submit well-aged grant applications

## The udderly ideal profile:

- An aptitude for scientific writing in English
- Relevant training or experience in rehabilitation, exercise physiology, health promotion, or other related fields
- Excellent organizational skills and autonomy
- Strong intellectual curiosity (and a sense of humor!)

## What the lab offers you:

- The opportunity to get hands-on with concrete research projects that have a direct impact on healthcare access in your community
- A dynamic and stimulating work environment
- A flexible work schedule and competitive salary

## Employment conditions:

- Position type: Part-time (1 day per week)

- Salary scale: Established based on experience and qualifications
- Start date: ASAP
- Duration: 4 to 6 months (possibility of extending the contract)
- Location: Centre Jean-Jacques-Gauthier or remote work

### **How to apply?**

Send your CV, a cover letter, and your piece of scientific writing you're most proud of to [alec.bass@umontreal.ca](mailto:alec.bass@umontreal.ca)

### **Join my team at Centre Jean-Jacques-Gauthier!**

As a physiotherapist and Certified Exercise Physiologist (ACSM-CEP), I am interested in access to cardiovascular and pulmonary rehabilitation. I have projects ranging from exercise physiology to the development of frontline clinical practices.
